CETAVER ® TUBULAR BRAID

E 1

1 - CONSTRUCTION

- Flat and hollow E glass fiber braid with tight stitches. This braid can particularly swell and stretch in order to fit perfectly bended conductors or complex formes .
- UNBLEACHED = Textile ensimage AS = Amino silane finish on yarn.
- A.R.I = Acrylic impregnation to avoid fraying when cut, enables fastenings, improves the blocking of bindings, has a better resistance to rubbing.

CETAVER® TUBULAR BRAID

E 1

3 - APPLICATIONS

- Bindings, bandings, fastenings, bobbins insulation.
- Allows to have a stronger binding than cord.
- Takes less place as it is flat.
- Can be used for class F H C insulations.
- Covering of copper wires for insulation which requires a good adhesion of the tubular on support.
- Enter less into insulation as it is flat.
- Replaces CLASS B rayon and cotton tubulars.

4 - PRESENTATION

- Conditioning : carboard or plastic jaws bobbins according to diameters.
- Colour : white UNBLEACHED A.S A.R.I. brown D.T.G
- If a colour marking is required, it is better to use "CETAVER TUBULAR PN" data sheet C1

We recommend to protect them from dust, humidity, at an ambient temperature.
